VISITORS FROM NEWFOUNDLAND

Vice-President and Secretary of G.W.V.A. of That Dominion Call On Grimsby Friends.

Charles F. Garland vice president of the G.W.V.A. of Newfoundland, and Herman W. Quinton, Dominion (Nfld.) secretary were guests at the Village Inn over the weekend.

Mr. Quinton's time is fully spent as secretary, but Mr. Garland has to work for a living and labors as a member of the fourth estate on the St. John's, Newfoundland, Daily News and Weekly Free Press.

They came to Canada to join their Veteran brethren in meeting Earl Haig, and accompanied that warrior's party as far as Winnipeg.

Their primary object in visiting Grimsby, was to renew acquaintance with some friends of the gentler sex but while here they took advantage of the district to absorb the wonders of the fruit belt. Fruit does not grow in very great profusion in our neighbor colony and the Grimsby district was a great revelation to the visitors.

Robert F. Harst of The Thirty gave them one trip and it was a question whether their wonder was greater at how one man could handle hundreds of acres of fruit such as Gordon R. Carpenter's or R. A. Hunter's, or how a family could live on a ten-acre plot such as T. R. Hunter's, each of which places they visited—and incidentally added much fruit eating to their experience.

Both were enthusiastic over the district and are going to take their views through the St. John's papers when they return home.

RETURN FROM TRIP

George Mackay provincial constable has returned from his vacation trip.

Another of Pennsylvania's pioneer structures is about to give way to the demands of modern transportation. The old wooden bridge, which spans the Susquehanna River at Clark's Ferry and which is said to be the longest covered wooden bridge in the world, is to be replaced by a modern structure of concrete.

Georges Gatinet, grandson of Georges Clemenceau, formerly Prime Minister of France, is an automobile salesman in Seattle. He was personal secretary to his grandfather until joining the French army in 1915. He has taken out first papers to become an American citizen. The grandfather was a teacher in the United States during his period of banishment from France.

EDGAR J. WOOLVERN WIDELY KNOWN FRUITGROWER DIES

One of Pioneers in Solving Marketing Problems—His Travels Had Benefited To Industry—Was Popular in Bess and Socially—Retired From Business of Years Ago.

One of the most widely known and highly respected fruit men of Canada, Edgar Johnson Woolverton, died at the home of his daughter, Mrs. Hamilton Fleming, on Friday, July 10th, 1925. Mr. Woolverton was the son of Dr. Jonathan Woolverton, one of the pioneer physicians of the district. E. J. Woolverton was born in Grimsby, January 20, 1841, the second of a family of five boys, three of whom have become widely known as members of the media and dental professions—Dr. Solon Woolverton, of London, still living; Dr. Theodor Woolverton, for many years attached to the United States Navy; Dr. Algon Woolverton, of Hamilton, and Deles of Toronto.

The late Mr. Woolverton had been more widely known as one of the pioneers in the fruit industry, he and a few associates spending much time and energy in the fruit-marketing problems in the early days of fruit growing in the Niagara belt. For many years he was president of the Niagara District Fruit Growers' Association, of which he was one of the founders and which for many years was the main marketing vehicle for fruit in this district. Up to some 20 years ago he was the head of E. J. Woolverton & Sons, but since that time had lived retired, spending much time in travel in different parts of the world. He married, Dec. 21, 1868, Ann Cecilia Nixon, daughter of Francis Nixon, of Nixon Hall, and the couple built Echo Hall, where he lived until the death of Mrs. Woolverton in June, 1907.

Though retiring from active business, he still held a keen interest in fruit marketing, and his annual trips to different parts of the world were additions to his fund of knowledge, which he disseminated to the advantage of the local fruit industry. Aside from the respect borne him in business, Mr. Woolverton was always a favorite with friends for his upright and lovable qualities. Surviving are three sons, Theodor, N. and Hamilton, of Grimsby; W. B. (Fred), of Ontario; and a daughter, Mrs. Hamilton Fleming, of North Grimsby. Dr. Solon Woolverton, of London, a brother, also survives.

The funeral took place on Saturday afternoon, July 12 from the residence of Hamilton Fleming to St. Andrew's Anglican church, where the Rev. J. A. Ballard conducted service, and later read the burial service in St. Andrew's cemetery. The pallbearers were: H. K. Griffith, Norman Nelles, Col. H. L. Robertson, O. Smith, W. R. Smith, C. E. Woolverton.

Among those present from out of town was the sole survivor of the late Dr. Solon Woolverton, a cousin, Dr. Walter Hough, a cousin, and Mrs. Hough of Niagara Falls, N. Y. Mrs. Woolverton, widow of the late Dr. Algon Woolverton, who has just returned from Europe, Mrs. Frank T. Woolverton of New York City, and Mrs. Julia (A.G.) Pettit, a sister-in-law, probably the last survivor of the older generation who lived for many years around Grimsby.

E. O. E. V. HOFFMAN, D.D.G.M.

Lodge No. 369, I.O.O.F., on Will install the officers of G. on July evening, July 20.

GOD MOVEMENT IN REAL ESTATE

Several Properties Change Hands in Grimsby—Paternal Home To Be Built.

If movement of real estate is an index, there is some prosperity here.

John brothers of Winona have sold their beautiful twelve-acre property the highway near The Pike to James of Brampton, who takes possession in October.

G. Armstrong has sold a house, a 300 foot frontage in Lakeside, to Mr. Dugvill of Hamilton.

R. Hawley, of Camden, has sold his lot to Mr. Hemmell, of Sudbury. J. Berger, has sold his fruit farm near Smithville, to Mr. C. G. Meisner, of Newry.

The old property on Nelson road has been sold and it is understood a gate residence will be erected.

It is reported L. L. Hagar has sold thirty acres at Vinemount and eleven acres at Patterson siding.

H. Hagar has sold property on Wellwood to Wilson Sutherland.

Gene Marlowe has sold his lot on Maple Avenue to Wallace Olmstead.

GOOD CRICKET FIFTY YEARS AGO

Grimsby Team Defeats Ancaster By Twenty-Three Runs—Ancaster 118, Grimsby 114.

(By Staff)

A recently-contested game of cricket came off at Grimsby on Saturday Day, between the Ancaster and Grimsby clubs. One innings each was played, resulting in favor of the latter by a score of 23; Ancaster 118; Grimsby 114.

Now if we were to add some of the names of the players that took part in that game, it would be interesting to old-time residents.

We have not the names but it is safe to mention a few who it is more than likely took part.

The game was played in 1875, and the above item is taken from "Fifty Years Ago" in the Hamilton Spectator, and among the names if we could get in the old roll fence in front of where Wellington Walker's house now stands we would be able to pick out more than likely—William H. Single, William Fitch, Murray Fitch, Arthur VanDyke all still living in Grimsby, A. Hamilton Pettit, George C. Pettit, Philip Gilray, B. R. Nelles, W. H. Nelles, James S. Randall, Joseph Sander.

Grimsby had a real cricket team in those days, and we have a recollection—not quite fifty years ago—but when here old timers played, and if we take the first four mentioned, add W. H. Pettit and a couple more, it is safe to say they would still put up a real team.

In the same column of the Spectator appears another item of advance in the Ambitious City, to wit:

The street cars have been furnished with a new patented whistle which is quite an ingenious contrivance. It is made of four or five strips of thin steel bent together like an old-fashioned hinge spring. When the car is started, gives slightly and prevents a jolt to the car and a jolt to the horse. The drivers speak very highly of it.

One could almost think from some of the street cars in Hamilton that the item was current news instead of fifty years ago.

And while we ponder over these quaint and curious volumes of "Fifty Years Ago" Del Durham lays on the line an independent dated May 23, 1895. Among the items is one which reads: "When Art Housman, Robt. Hughes and Ed. Norton who have been working at the Honey Creek basket factory, reached the factory on Friday morning they were informed that they would not be needed any longer as the frost on the previous night had blasted all hopes for a fruit crop in that section."

Beamer Family Will Hold Reunion Aug. 8

DENCH, FIREBUG, GETS HIS RELEASE

Sentence Is Suspended, But With Several Restrictions, By Judge Campbell.

John Albert Dench, Smithville, recently convicted of arson before County Judge J. A. Campbell, was given a suspended sentence by the Judge on July 10.

Under the terms of the suspended sentence Dench must sign a pledge that he will abstain from liquor for a period of five years; he cannot enter the Counties of Lincoln or Welland for a period of two years except on business or with permission of the crown attorney; he must report monthly by letter to the crown attorney and it was suggested to Mr. Pepler, his attorney, that Mrs. Dench report quarterly on his general behavior.

The Judge took a lenient view of the case because of excellent recommendations given by Sheriff McLauron of Simcoe, J. T. May, his father-in-law, Rev. J. S. McMillan, Rev. R. J. Fallow and Rev. H. A. Weirwood. The Judge also considered the fact that Dench had been in jail since May 21st.

The Judge advised Dench that he must appreciate the fact that he was being generously used.

Dench replied that he did not have words to express his appreciation. The Judge then told Dench that he was following the course he had taken in order to assist Dench in working out his own reformation. He advised the prisoner that he could have sent him to prison for a long term, but he had dealt with the case with a desire to assist him in reformation.

Dench assured the Judge he would be good, and the Judge replied that sentence could be imposed if Dench did not live up to the agreement of reformation.

His wife had sent a letter offering bond for her husband's good behavior, also admitting she was partly to blame because she had not been living with him.

Following is an editorial in the St. Catharines Standard of Saturday, July 11:

Saving A Citizen

No one could read the suspended sentence terms imposed by Judge Campbell in the arson case of Dench in the County Court yesterday without appreciating the fact that His Honor had given the case the very closest study and thought. It was a mighty serious charge on which Dench was found guilty, that of burning up other people's property, and because he might have done it under the influence of liquor was certainly no excuse. But the humanely minded Judge took in to consideration that Dench might be a useful citizen to his country. Sentenced to a long term he would not be for years, and would probably never be restored to useful citizenship. Dench was simply put on probation, a very strict one. He was ordered to stay sober for five years, and if he starts for two, which he probably will, he will make it a lifetime.

Taken by and large, some of the so-called easy sentences passed out in Ontario courts to reform prisoners, do not reform them at all. They simply encourage criminal tendencies. In the Dench case, however, it can be seen where the Judge made personal investigation beyond the confines of the courtroom, and if Dench were a hard-boiled case, which it seems he is not, it would have been easier for him to have served a stiff sentence than carry out the terms laid down by Judge Campbell. Everyone hopes that Dench will make good as the

He will not be forgotten that His Honor Judge Campbell, rendered a stiff sentence, nevertheless, it enjoined the prisoner to work outside of prison walls in useful or helpful employment, to keep sober and to maintain his family. The slightest violation from a good conduct might mean to this man a long term in prison. The other sentence the Judge could have rendered was to put Dench down for ten years, let the State keep him, and let the municipality sensibly keep his family.

A most interesting event is scheduled to take place on Saturday, Aug. 8, at the residence of Nelson Chadwick, in Gainsboro township. It is a reunion of the Beamer family, and their name is legion.

Away back in the history of the Niagara Peninsula do we read of the Beamers. The earliest record the writer has available is 1790—125 years ago. In that year, according to the records of Township No. 6 (which became the Township of Grimsby in 1795), we read:

"At a meeting of the inhabitants of Township No. 6, this fifth day of April, 1790, at the house of Mr. John Green, according to an order from court and an advertisement for that purpose, the following persons were elected into the office annexed to the honorable court for their confirmation. John Moore, Clerk; John Beamer, Constable."

From then on John Beamer was connected with the court about every year until 1821, being town warden in 1812.

And there is probably no year in the history of Grimsby township but what some member of the Beamer family has held office up to very recent years.

This was but one branch of the Beamer family that settled in the wilderness of the district in those days. The Township of Grimsby where this reunion is to be held has had on other branch of the family from early times, that has become best known in public life.

The fifth, sixth, and seventh generations of those old settlers will surely form a large throng and will no doubt be gathered from many widely separated parts of the globe.

An unostentatious affair, however, appears in the columns of The Independent this week which tells a simple story, but some interesting history will be told that day of Beamer family records are read.

FRETZ RE-UNION

A gathering of 275 members of the Fretz family, scattered throughout Louth and Clinton townships, in York County, and through various parts of Ontario, held its first reunion in Victoria Hall park, Vineland Station, on Saturday. Noon lunch was served in cafeteria style, following which a double program was carried out. One consisted of speeches and experiences of leading events in immigration and settlement, accompanied by community singing and music. The orchestra of four instruments, one of which was a musical saw, proved to be a grand success. The other program consisted of games on the Rittenhouse school grounds. Among leading speakers were: Chris. Fretz, president of the event; William Fretz, Vineland; M.R. Fretz, Markham; and Rev. Messrs. Kelly, Bricker, Schantz and Coffman. The second reunion will be held two years later. Organization resulted in the election of Chris Fretz, president, and J. C. Fretz, secretary-treasurer.

MUSIC AT C.N.E.

J. R. Atkinson director of the Canadian Bureau for the Advancement of Music is sending out the following notice with regard to the syllabus of the Musical competition at the Canadian National Exhibition:

Some difficulties have arisen in the securing of test pieces, and we shall appreciate it if you will advise your readers of the following:—

Vocal Department

Class 1. Dramatic Soprano—"Hear Ye, Israel" (from "Eljah") Key B Minor and Major.... Mendelssohn (Ditson or Church)

Note—Any Edition will do.

Class 2. Lyric Soprano—"With Verure Glad" (from "The Creation") Key B flat (John Church).... Haydn

Note—Any Edition will do.

Velma Dunham was successful in winning the Introductory Grade with

the "Wanderer"....

Schubert Key D. In English.

Any Publisher

Note—Should be B Minor

Piano Department

Class 12. Piano under 14 Years—"German Dances" No. 1 in C (Schubert).... Beethoven-Solus

Note—Should be "Frederick Harris" Edition.

The last date for entries for the

contest is Aug. 1.

FACTS AND FANCIES BY FRANK FAIRBORN (Jas. A. Livingston)

Evolution Or?

At a trial in Dayton, Tennessee, nine of the jurymen were in their shirt sleeves. I would like to see them step into the jury box in their shirt sleeves, when Judge John S. Campbell was on the bench.

The trial in Tennessee is to discover whether man sprung from the monkey or the dust of the ground.

That's a point that can be argued for a hundred years without a decision being arrived at. The old-fashioned theory is good enough for me.

Contentious!

The first volume of Canada's official history of the war by Sir Andrew (Dr.) McPhail is out and it has already drawn fire from a lot of critics.

Lieut.-Col. Bruce says in plain words that some of Dr. McPhail's statements are false.

So far as I have read the published extracts, they remind me of a newspaper reporter who instead of giving the facts of an event as they happened, gives his own opinions. An historian should simply give the facts and let the people draw their own conclusions.

The General Sam Hughes' controversy is revived and stern condemnation is given Vancaster and Salisbury Camps, and the supplies sent with the Canadian contingent.

Produce Properly First!

A movement is on foot at present to start a big advertising campaign to boom Canadian fruit. I was just wondering if the writers of the advertisements would specialize on half ripe Early Richmond Cherries, Green Grapes, Triumph Peaches, and the various kinds of useless plums. My idea is that no amount of advertising will popularize inferior fruit. Produce the goods then there will be something to advertise.

The trouble with our fruit business, lies, not in lack of markets, nor lack of dealers, but in lack of good ripe fruit, properly put up.

If an advertising campaign is put on the growers will have to produce good fruit to back up the advertising. What would be the sense of advertising delicious Cherries and then shipping half-ripe Early Richmonds?

Every year the Cherry market is ruined by the shipment of half-ripe Early Richmond Cherries. A million dollars spent in advertising would not make the people eat those green cherries.

Half the grape crop in the Niagara District is shipped out each year long before the grapes are ripe. Another million dollars spent in advertising grapes would not make the people pretend they liked green grapes.

You are working on the wrong end boys—the selling end. If you would spend half the time, thought, energy and money on the producing end that you spend on the selling end, you would not have to spend a dollar to sell your fruit.

It is rumored that there will be a Dominion election this fall. If so it would be a good time to do some talking along the line of reducing the membership of the House of Commons. I

am fully convinced that there are twice as many men in the House of Commons as are required for the needs of the country, in fact, I would go so far as to say that one-third the number would do the work just as efficiently and far cheaper than the present number do.

It is utterly impossible that each member in so large a number can do useful work and a man cannot do useful work why have him there? A hundred men certainly could do just as good work and do it quicker than the present number can.

It is said that the Senate is useless—possibly it is—but at least two-thirds of the members of the House of Commons are equally useless.

TRANSPORTATION

Hamilton, Ont., June 13, 1925.

To Editor of The Independent,
Dear Sir,—The Government's earnest effort to existing corporations to transport Canada's cattle and other products to overseas markets at reasonable rates seems to have failed.

Doesn't this bring us back to the old adage: if you want anything properly and well done, do yourself! Which leads us up to some of the old work the "Canadian Government Merchant Marine" has done, and demonstrates her ability to further our ocean transportation problems.

A few more of the 10,000 ton type ocean liners would do the job.

Why does not the Government take over the Peterson ships now ready, and order eight more of the Diesel engines built in Canada at once, ready for the 1926 crop, which would accomplish the desired result. Just fancy the fall of the North Atlantic conference, announcing an increased cattle rate from \$25 per head, instead of a reduction of \$10 to the former rate of \$15.

Newspapers again revive the fact that in 1914, the rate on the new Trans-Continental Railway from Montreal to Quebec was 6c per bushel on wheat, but owing to influences that developed, this rate was cancelled, and the substituted, which still exists.

Of course, the flow of wheat immediately stopped, and with it the Canadian People's \$170,000,000 investment in the best graded, constructed, and equipped long distance railway in the world, became two empty streaks of rust.

Sir Wilfred Laurier, the chief promoter of the Canadian Trans-Continental, on the report of the rate estimated the rate of 6c as most practical.

Why boost the rate to 25c and get no business?

Why not re-state Sir Wilfred's rate of 6c and save 14c to the grain growers?

A saving of 10c on 400,000,000 bushels is \$40,000,000.

Why should we have to pay 14c more for wheat than we would have paid if the rate had been 6c?

William at St. Lawrence, a year ago, was the largest port, and fastest, on the American Continent.

Sir Wilfred had the ideas, but his various agents forgot to carry them out.

6 cents per bushel of 60 lbs. is 10c per cwt. on 12

per ton, and as coal freight classification is much lower

than wheat, Alberta Coal could be brought to Toronto

a slightly lesser distance, at \$2 per ton, and New

Scots coal to Quebec and Eastern Ontario for slightly

less. It is not too late to move now. In fact with

this trans-continental rate, Pacific coast trade from

hundreds of miles south, would come up to our

trans-continental, thence to Quebec, Liverpool and

Europe, via the shortest and cheapest route. This

would demonstrate the advantage of a moderate rate,

attracting an abundance, or perhaps a super-abundance

of traffic.

The enlargement and extension of the Government

Merchant Marine, would fix both inland and ocean

rates via Canadian routes, the most advantageous in

the world. Then watch Canada take her place in the

forefront of the world.

With Canadian wheat the best in the world, only

5c to 10c water, as compared with U.S. Wheat at 25c,

a regiment of soldiers could not keep a million U.S.

farmers out of Canada during the next year, and so

other million from Britain and other parts of the

world, the choicest farmers without any immigration

agents.

With Canadian cattle, the best in the world at

\$3 to Quebec or St. Louis, as compared with \$13

from the U.S. West, the best stock raising the

over would come here.

The St. Lawrence deep waterway and power de-

velopment, will likely take years of international ne-

gotiation, before a real start is made.

Why doesn't Canada develop her own water power,

on her own present canals at once, and get the benefit

of power for her railways at a quarter the utility cost

of coal. Why not attach power development to the

completed part of the new Welland Canal, and save

enough money to pay for the whole canal before it is

completed?

If the U.S. is in a hurry to develop the St. Law-

rence deep waterway, why should Canada worry?

With a 6c rail rate - wheat from the prairies to Que-

bec, and water steamer and Government Marine in-

suring reasonable ocean rates.

Why adjourn Parliament with so much urgent

unfinished business?

Why talk election, when the present Parliament has

a year or two yet to run?

Every present member still has a mandate to deal

with all these questions.

Yours truly,

W. O. SEALEY

IF WINTER COMES

(Meag. Wis. Chronicle.)

It is reported that one of the fastidious new-y married ladies down across bread with her gloves on. This incident may be somewhat peculiar, but there are others. The editor of the paper needs bread with his she on; he needs bread with his shirt on; he needs bread with his pants on; and unless some deligent subscribers to this Old Rag of Freedom pony before long, he will need bread without a shingon, and Wisconsin is no Garden of Eden in the winter time.

Notes and Comments On Current Events

(By PETER PETERKIN)

Last month the writer had occasion to use the metropolitan lines running out from Toronto quite recently. They give an excellent service, but the rates are higher than the suburban lines running out Hamilton and they are losing money fast, having lost \$200,000 behind last year according to their own report. The Toronto Transportation Company is anxious to take some of these lines over from the Hydro Commission, claiming that they can operate them much more cheaply, but so far they have not succeeded in gaining the Hydro's consent to the change.

For the first time since the T.T.C. took over the Toronto street railway system the detailed report of its year's operations shows a balance on the right side of the ledger, on which the T.T.C. deserve congratulations. Their report is a model of clearness and shows every detail of their business to the Toronto public, so that he who runs can read. If the Hydro Commission would only issue to the Ontario public a similar clear detailed statement of their financial and their operations every year, much of the prevalent dissatisfaction with Hydro methods would disappear.

In the matter of selecting a jury when a criminal case is to be tried an immense gulf lies between British and American methods. In England, for instance, no matter how wealthy or politically powerful the defendant may be the proceedings are somewhat as follows: The names of twelve men are drawn. The judge then asks these men a few pointed questions.

The barristers appearing for the crown select the defendant perhaps object to one or two jurors whom they consider likely to show bias, and if the objections are sustained these jurors are promptly replaced. The whole process takes about half an hour and the results are infinitely superior to those attained in the United States where the pitiable farce of selecting a jury may take six weeks or even six months, when the defendants are sufficiently wealthy.

According to recent reports from Shanghai the whole question is now being investigated by a commission from Peking. A strong and intelligible national sentiment appears to have arisen of late amongst the educated Chinese. This sentiment is unfortunately being exploited by foreign agitators—chiefly Russia, Bolsheviki—for their own ulterior designs, and is being systematically directed against Great Britain.

American diplomats appear to have taken a wrong view of the case being infinitely less experienced in the ways of the East as compared with Great Britain. It is very much the opium case all over again. Great Britain refused to place an embargo on opium exported from India over which she had almost complete control, on the grounds that greater quantities of opium would be smuggled in from China over which she would have no control, and neither would China, there having been no such thing as a settled government there for a great many years past and apparently little hope of any for a long time to come.

China's troubles are mainly due—as is so commonly the case with most people who have troubles—to the Chinese themselves, who are only now slowly awakening from the slumbering stagnation of centuries. The great mass of the people still remaining incredibly ignorant of conditions outside of a very limited range in even their own country. Russia's awakening was attended with terrible results, it is to be hoped that China's awakening may not follow a similar course. In the meantime it is simply fantastic to suppose that Great Britain has any imperialistic purpose whatever in China.

Household Clearance

Many a prudent housewife has found it profitable to call upon Independent Want Ads to effect a household clearance sale.

In many homes there are stored away disused articles of household equipment, sewing machines, baby carriages, articles of furniture and even personal apparel and other individual things—all of which may be turned into ready cash.

By taking advantage of The Independent Want Ads, a market may be developed for all used articles that may have any intrinsic value.

A household clearance sale, conducted through Independent WANT ADS has been the means of ridding many a household of discarded articles.

INDEPENDENT WANT ADS will bring buyer and seller together—use them—THE COST IS SMALL.

MAINLY FOR WOMEN

Is This Your Way?

There has come in recent years a very definite swing of the pendulum back to the rich preserves of our grandmothers. Our mothers were carried away by the novelty, convenience and keeping qualities of glass canned fruit and the war with its scarcity of sugar kept us faithful to the almost unsweetened fruit, but now we are changing. Certain fruits we find are more appetizing in appearance and richer in flavor if preserved. Keeping the fruit whole and "right" in the clear, firm jellied syrup, and yet having it tender, was almost a lost art among careless housewives. Even for those who have among their most treasured possessions genuine old recipe books telling, in delicate tracery or old-fashioned hand-writing, the secrets of success in preparing delectable "sweet-and-sour", considerable common-sense, reasoning and careful study of nature of the fruit to be preserved will be necessary.

When raspberries, strawberries or any of the small, juicy, ripe berries are put directly into syrup and cooked sufficiently to form preserves, the result is far from good looking. To preserve fruit in comparatively whole and attractive form and color make hot syrup by adding a little water to the sugar—that has been measured pound for pound to preserve the fruit—and as the syrup boils, skim it carefully, until the syrup is clear. Then add the berries and cook slow until thoroughly cooked through and tender.

Small fruits are dropped directly into the boiling syrup, and when done are carefully skimmed out to avoid breaking.

The syrup is then boiled down to the right consistency for preserves and poured over the fruit, or the fruit is carefully added to the thick syrup; and when the whole is boiling hot it is quickly sealed in glass jars.

When cooked down to a thick preserve, these sweets can be kept in glasses, or small jars, the same as jelly with only a covering of paraffin over the top, before slipping on the tin cap or paper covering. But sealing in air-tight jars is better for the "right" preserves, where the fruit is retained as whole as possible in the thick clear syrup. Do not put away the sealed jars until cold. Give an extra turn to the cover, and wrap in manilla paper before setting them away in the preserve closet.

Ripe, sour cherries make the most delicious preserves of any of the small fruits; but there is also a "little trick" in keeping them at their best in form and taste. After carefully washing the cherries, keeping their form apparently whole and unbroken, allow an equal weight of sugar. Sprinkle the sugar over the fruit and let it stand about an hour before cooking. Drain off the juice and boil it slowly about fifteen minutes, skimming until it is perfectly clear; then add the cherries and cook slowly until they are tender, and the preserve is thick and clear, and seal in small jars while hot.

Raspberry Time

Raspberry Puffs: One cup butter, 1 tablespoon sugar, 1 egg, 4 tablespoons sweet milk, 1 cup flour, 1 teaspoon baking powder. Put four cups. Put 1-4 of the above butter in each cup, and steam 1-2 hour. Serve with any liquid sauce.

Raspberry Flum: Beat the whites of three eggs until stiff. Add half a cup of powdered sugar and beat again. Then add a cup of mixed raspberries, put through a sieve, and beat until you have a "flum" light as snow. This may be served in a glass bowl or in individual glasses with a fresh raspberry on each.

Raspberry Ice Cream: 1 quart raspberries, 1 cupful milk, 1 cupful sugar, 3 cupfuls cream. Blend the milk and cream and dissolve the sugar in it. Cook. Mash the berries and add to the above mixture. Freeze.

Baked Raspberry Dumplings: Two cupfuls red raspberries, two cupfuls flour, half cupful milk, one and one-half tablespoons of butter, one and one-half tablespoons sugar, one teaspoonful baking powder, half teaspoonful of salt. Mix the flour, salt, sugar and baking powder into a bowl, rub in the butter, add the milk, using a little more, if necessary, and mix quickly into a dough as soft as can be handled. Roll out into a sheet about one fourth of an inch in thickness, cut into six or eight squares, put a portion of the berries in the centre of each, sprinkle with a teaspoonful sugar, then pinch the edges close together. Put the dumplings in a granite baking pan, a slight distance apart; drop over them one tablespoonful of butter cut into bits, sprinkle with one cupful of sugar and pour one cupful of boiling water around them. Bake in a moderately hot oven for twenty or twenty-five minutes and serve with a liquid sauce flavored with raspberry, lemon or nutmeg.

Raspberry Hard Sauce: Work one-half cupful of butter until creamy and add one and one-half cupfuls of confectioners' sugar very gradually, while stirring and beating constantly; then add one-fourth cupful of raspberry syrup very slowly, beating well. Add a few ripe berries to garnish this sauce and serve it with plain boiled rice, a cottage pudding or dumplings.

Sugarless Canned Berries: Raspberries, blackberries, blueberries, etc., should be hulled and stemmed and, if necessary, washed. Pack loosely in sterilized jars. When done down to ensure a full pack but do not crush the fruit. Pour in boiling water to completely fill the jars. Put on rubbers and tops, but do not tighten the tops completely. Leave them just a little loose to allow the steam which accumulates inside the jar to escape. If a spring-topped jar is used, leave the side spring up. Place the filled jars in the boiler on the false bottom, with enough warm—not hot—water to come about three-quarters way up the jars. Cover the boiler with a clean-fitting lid, bring the water to a boil and continue to boil (or sterilize) for 10 minutes. Remove boiler-lid, let steam escape for a moment, then tighten tops and remove from the boiler. Invert to cool, in order to watch for any defects in the sealing. Store in the dark.

Raspberry Apple Jelly: Use for this the earliest windfalls, taking one pint of raspberry juice to two pints of apple juice and a scant pound of sugar for each pint of juice. For raspberries and currants, eight quarts of raspberries and six pounds of sugar. Clean and wash currants; cook them one hour and strain; return juice to kettle, add sugar; heat to boiling point and cook slowly twenty minutes. Add raspberries, a quart at a time, skimming them off into jars as fast as the syrup reaches a boiling point with a quart. Fill jars to overflowing with syrup, and seal.

Raspberry Jelly: For this the berries must be fresh and not too ripe. Pick over the berries, wash and drain, wash, cook slowly until they look white; strain through a jelly bag without squeezing. Measure juice, boil five minutes, add an equal quantity of sugar, boil three minutes, strain, and pour into glasses. Let stand twenty-four hours in a sunny window or on a tray set on the plate warmer before covering. Half pint of juice with half raspberry juice is more certain to jelly.

Our Diamond Princess

Princess Mary (Victoria), who celebrated her birthday recently, narrowly escaped having her age mentioned in her name. "My dear little Diamond Jubilee," Queen Victoria called her because of her arrival just before the famous celebration, and King Edward for the same reason desired to have her named "Diamond." After due consideration, however, this was considered too great a departure from tradition in royal nomenclature and the Princess was christened Marie Alexandra Alice Mary.

Away from the heated Town

Ontario's Highways are a welcoming challenge to you

Somewhere a vagrant breeze ripples through orchards and grain fields—somewhere nestling lakes are rippling in laughter—somewhere there is happy health and freedom—and you can find them all in a motor trip in Ontario.

There is a good road to follow. You don't need to stay on the provincial highways. The county roads in most parts of the Province are in fine condition and lead to beauty spots you do not know.

Take a few days off in your car. Take the family with you. In every direction you will see wonderful scenery—rivers and lakes—hills and valleys—beautiful farm country and beautiful towns.

Ontario's highways are a welcoming challenge to you and other motorists. Use them, but use them safely.

See the country as you go. Drive moderately. You cannot make any speed records, although you may break speed limits. Your fast driving tears up the road surface which you and other users of the roads must replace. There is no magic about road repair work. It costs hundreds of thousands of dollars a year, and the money comes out of your pocket and those of your neighbours. In your own interest you should be careful about needless doing damage.

The Government is certain of the co-operation of most users of the roads by driving at moderate speeds as provided by the law. Those who omit to comply with the law and this request, should understand that the enforcement of the law will not be relaxed in any respect.

An advertisement issued by the Ontario Department of Highways to secure the co-operation of motorists and truck drivers, Automobile Clubs, Good Roads Associations and all other public spirited bodies, in showing the utmost of the roads in the Province.

The HON. GEO. S. HENRY, Minister, S. L. SQUIN, Deputy Minister

WHEN USING
WILSON'S FLY PADS
READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not soiled) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.

Put the plates away out of the reach of children until required in another room.

The right way to use
Wilson's Fly Pads

ST. JOSEPH'S CHURCH, GRIMSBY THURSDAY & FRIDAY, JULY 16-17 THE BEST YET! EVERYBODY COME!

AFTERNOON TEA will be served under canvas from 5 to 7.30. Refreshments from 7.30. MUSIC IN ATTENDANCE throughout the evening from 5 to 7.30, and 9.30 to 11.00. FUN AND ENJOYMENT for all. Refreshments a perfect midway of booths, good prizes. Grand drawing for gold piece.

COME AND ENJOY YOURSELF!
THE TIME—Thursday and Friday, July 16 and 17
THE PLACE—St. Joseph's Church Rectory Grounds.

ADMISSION FREE!
Children must be accompanied by Adults.

E. J. Driver, Thomas Riddle, Mrs. Driver, Miss Dorothy, and Masters John, Jimmy and Tommy Driver motored from Woodstock on Sunday and spent the day with Mr. and Mrs. May Hunter, Maple avenue.

The 1st Co., Grimsby Girl Guides, held their annual Field day on the campus at Lake Lodge on Wednesday afternoon, July 22. Sports commenced at 2.30 p.m. Afternoon tea will be served. Parents and friends are cordially invited.

Sunday night, about seven o'clock, Edward Cowell, Robinson street north, while turning off the highway into Oak street, collided with an American car driven by Joseph Roman, Alden, N. Y. Both cars were badly damaged, but no one was injured.

Mrs. Arthur Norton, 6 Ontario St., underwent an operation in St. Joseph's hospital on Monday, July 13, for a growth. Dr. Perry of Hamilton operated, assisted by Dr. MacMillan of Grimsby, finding a breast tumor. Mrs. Norton is getting along splendidly and expects to be home the end of this week.

The annual garden party of St. Joseph's church will be held on the rectory grounds from 5 to 11.30 p.m. on Thursday and Friday, July 16 and 17. Afternoon tea will be served from 5 to 7.30, and light refreshments during the evening. There will be a midway of booths with good prizes, and a drawing for a gold piece.

May Hunter on Maple avenue had an orchard of Montmorency cherries on Saturday that looked as if he would never get it picked. There are about 150 trees in the lot, but by Monday night he had 200 baskets picked nearly all 11-quart. And because that the crew picked 41 baskets of beans. Some growers say they can not get pickers.

At a special meeting of the Grimsby township council recently there was passed a bylaw providing for the part of the county road system from Tapscott road and south to the limit, and also the old Mountain road running south from King street to the Blackfoot line, being handed back to Grimsby for maintenance, the bylaw being subject to ratification by the highways department.

Rev. F. S. Milliken, pastor of St. John's United church, leaves for a month's vacation today. The Rev. C. L. Poole, of the Central United church, will take charge of both services, which will be held alternately for the next four Sundays, between the two churches.

The thanks of the Public Library Board are again due Mrs. J. H. Talbot of Mountain street for a further donation of books to Grimsby Public Library. The titles are as follows: The Lost Discovery, by Mrs. Hallie Reynolds; Ramona, by Helen Jackson; The Four Strangers, by Frank L. Packard; When Charles the First was King, by J. S. Fletcher; The Orange-Yellow Diamond, and Bear-haven Keep by J. S. Fletcher.

Sept. 6.	St. John's United	Rev. F. S. Milliken.

Services at 11 a.m. and 7 p.m.

PUPILS SUCCESS

At the Toronto Conservatory local center examinations held in Hamilton recently, three pupils of Mrs. George E. Bolton's Piano music class who entered for the examinations were successful, having passed with honors. Introductory grade piano—Mary Reid, honors; Stella Penfold, honors. Elementary grade piano—Verna Florence Dunham, honors.

Mary Reid won the bronze medal given by the teacher for highest honors. Stella Penfold was a close second and won second prize, a gold ring.

SWIFT-MARLOWE

A pretty wedding took place on Wednesday, July 8, at Grimsby Beach, when Florence, only daughter of James and the late Mrs. Marlowe, was united in marriage to Earl R. Swift, B.Sc. Burlington. The bride looked charming in ivory crepe de chine, with tulle veil and wreath of orange blossoms. She carried a bouquet of Ophelia roses and lilies of the valley. The bride entered the drawing-room with her father, and was attended by little Francis Ward and Francis Kemp as ribbon bearers, they being dressed in fluffy white dresses carrying baskets of sweetheart roses and baby's breath. Harold Kemp played the wedding march, and Miss Vera Brownlee sang while the register was being signed.

After the wedding a reception was held. Mrs. William Dunn, aunt of the bride, received with the bride's father. Mrs. Dunn wore a black lace gown and hat to match. Mrs. Swift, mother of the groom, wore black crepe de chine dress and marvellous hat. The happy couple left on the evening train for Muskoka and Upper Lakes. The bride's traveling dress was a gray crepe motor tailleur, marvellous hat and grey shoes. One of town guests were from Oakville, Toronto, Port Rowan, Hamilton, Brantford, Niagara Falls, Stratford and Burlington.

OPTOMETRY

It's value to the public.
By VERNON TUCK, R.O.
Grimsby, Ontario

Country and city children need the Optometrist. Country and city grownups need him. All men and women who reach middle life should assist their eyes with glasses when they read, sew or do other close work.

Then there is a large class of people whose eyes are almost or quite normal, but whose work throws undue strain on the eyes, who should get the help of glasses during working hours.

The above further discloses the value of Optometry to the public, or rather, the public need of the profession.

Remember!
(To be continued next week.)

CIVIC HOLIDAY WILL BE OCT. 5

Council Asked To Proclaim That Date—First Tax Instalment Will Be 31st Month.

The postponed regular meeting of the town council was held on Thursday night, with Mayor James A. Livingston in the chair and Reeve M. Mansell, Aldermen St. John, Bird, Hoxley and Durham present. Three permits were before the council to be passed on: A store front of wood, steel and copper for the A. F. Hawke store, to cost \$200; a new house on Maple avenue, for W. G. Gintz, to cost \$2,500, and a new house on Main street west, for L. A. Bromley, to cost \$3,500, were dealt with, and the second permission to proceed granted.

The assessment on the first installment of taxes was next taken up, and the council had no other alternative but to set the rate at 37 mills. The rate last year for the first call was only 31½ mills but the debentures for the paving laid on the Main street, and debentures for the land purchased for the new high school, besides other smaller loans, fell due this year, making it necessary to raise the rate high enough to meet all these debentures. It was suggested that the extra mills be put on the December installment but the council thought that the higher rate could be paid better on the first call.

It was moved by Reeve Mansell and Marley that all taxes must be in by August 15, 1926.

The fire department sent a committee to the council asking to have Aug. 5 proclaimed civic holiday. After some discussion this was decided upon, the mayor to issue a proclamation to this effect.

This committee also asked to have streets roped off leading to Mountain street between Main and Elm, for two nights, July 23 and 24, which was granted.

It was moved by Aldermen Marley and Durham that the resident clock be loaned for \$1000. Accounts were passed totalling \$421.63.

PROTECTION FOR LEVEL CROSSING

As a protection for foot and vehicular traffic at the intersection of Station road and the C. N. R. main line at Winona, the board of railway commission of Canada has ordered that cantilever road signs be erected at each approach to the crossing. A letter to this effect was received by the Grimsby township council at its meeting last week, and was in reply to a communication forwarded by the council to the commissioners at the time of the Patrick Hand fatality. The Grimsby councillors asked for adequate protection, and suggested either wigwag automatic signals or a watchman, but the board in its answer considered signs would meet requirements. It was advised that the township obtain them from the highways department.

After some discussion the council decided to advise the board that this was not an ordinary crossing, and that protection other than signs would be necessary to reduce the danger. Mention will be made of the fact that the victims in the last two fatalities at the crossing were residents of Winona and well acquainted with the surroundings. Signs in both of these cases, it was felt would have been useless.

BACKED DOWN MOUNTAIN

The engine of a motor car going up the Grimsby mountain, about 12 o'clock Saturday night, went dead. The brakes were not working well, and the car started backing down, turning at Oak street, which is very dark at this spot. The car went into the deep ditch, turning completely over. Fortunately, none of the occupants, who were Hamilton people, were hurt. The glass in the side of the car was badly broken.

New Road Map

Appleton's New Road Map of Western Ontario is now ready. Completely revised; it shows all the roads clearly. Principal highways are shown in red.

We also have—

Obituary

JOHN M. KENNEDY

Known and respected for many years by all classes of citizens of Beamsville and Clinton township, John Henry Kennedy passed quietly away at the home of his son on Monday evening, July 4. He was in his 54 year. There were four of the earlier residents of Beamsville who had a clear recollection of the first history of the village and its settlers than the deceased. He had spent practically all his life here, and his greatest enjoyment was the depicting of old-time events, and he had a colorful way of summing them up. His mind was keen until some few months ago, and he took an active interest in all the affairs of the day. Two sons, John W., of Beamsville, and L. H., in California, and two daughters, Mrs. E. D. Bryant, of Detroit, and Mrs. F. H. Harris, of Akron, Ohio, survive. The funeral took place on Thursday afternoon to Mount Osborne cemetery.

THIS CREAMERY HAS GOOD BUTTER

Crock Packed Twenty Months Ago Tests Perfect—Same Brand as Butter Sold in Grimsby.

On October 12, 1923 a barrel of butter from Hamilton had a crock of butter packed at the Caledonia Dairy, limited. The lady evidently forgot to call for the butter, and it is still kept for her at the dairy, being now 21 months old.

On June 24, W. P. Jones, Dominion chief of dairy manufacture, was at the Caledonia Dairy, passing judgment on a crock of butter to be exported to London, Eng. After scoring the crock of butter, which by the way scored 40 points for flavor, with a total score of 90 points for the entire crock, Mr. Jones was asked to score the crock of old butter. The result was 24½ points for flavor, with a total score of 51½ points, which means that it was just one-half point off from still being a first-grade butter.

"Very remarkable," was Mr. Jones' comment on this. This butter was taken from a churning out of the general run, and has not had special care during these months, being kept at a temperature of 24 and at other times 50 to 55 degrees above zero. Who dares say that Ontario butter will not keep for a long time without getting stinky?—Hamilton Spectator.

D. E. Anderson, "Superior Stores" Grimsby, has the Sole Agency for this Brand in Grimsby.

BOOK REUNION

The third annual gathering of the Book's took place at Murray Wilson's, Clinton township, on Saturday, July 4th. The day was not an ideal one, but over eighty were present.

A short program was given and new officers elected as follows:—J. H. Book, president; Alanna Strong, secretary; Mrs. Joe Lindenberg, Mrs. D. W. Nichols, Mrs. J. H. Book, John Book, Alana Hensberger and James Zimmerman, committee.

Alana Hensberger was chosen chairman and the following collections given:—Speech by president, instrumental Miss Nichols, community singing, speech by John H. Book, recitation by Marie Book, duet by Mrs. J. H. Book and E. W. Book, speech by D. W. Nichols, recitation by Elsie C. Book, Mrs. Fairbrother, speech by Wm. Book, violin solo by Miss J. Walther, recitation by Frank Book, speech by H. Brown, song by Willard Book, speech by Mr. McIntyre, of Huronford, who recalled being on the Wilson homestead some 41 years ago. The happy gathering closed with God Save The King, after which all parted, hoping to meet another year and thanking Mr. and Mrs. Wilson and family for the good time.—Beamsville Express.

AN INTERESTING METAMORPHOSIS

And this from the editorial page of the staid Smithville Review:

Attention men! The female of the species, not content with the havoc she has already wrought, is now planning to keep the men awake at night and drive 'em wild. The German dye workers, aided and abetted by the sirens and flappers of all nations, are enlisted in this diabolical drive. Lightning-bug stockings are about to cause riots along Berlin's fashionable thoroughfares and spread over the face of the earth.

Tired of silk in the ordinary colors, the Berlin girls have fallen for the latest invention of the dye experts, stockings treated with phosphorus which glow in the dark. They're so practical, their wearers say. No one wearing these luminous oddities ever falls down stairs in the dark, for they're much better than a pocket flashlight. Some say they wear them to save the electric light bill.

In the daytime the "lightning bugs" look just like any other stockings. But at night, oh, boy! they throw forth—unsubdued in various shades of violet and green, and sparkle like gems.

We thought the limit had been reached with short skirts, rolled stockings and sleeveless gowns, but now she comes along with a stunt that will make men sleep soundly.

R. E. Dowling, Smithville Review, December 31, 1914.

Mrs. J. H. Book, Grimsby.

Robert Forster, Grimsby Post.

October 6, 1925

E. H. Lancaster, St. Catharines.

June 1, 1926

There should be a lot more money in circulation now that the Home bank directors have been freed.

GRASSIE NEWS

Southward of Grimsby and party last night at the home of Mrs. Young of Grimsby. There they enjoyed one of the programs yet. There was a large crowd present and the receipts were \$53.00.

Mr. and Mrs. Isaac Southward made a trip to Niagara Falls, N. Y. on Tuesday and called on a number of friends among whom was Harvey Campbell the old-time Grimsby Constable. Mr. Campbell's many friends here will regret to learn that he is in very poor health and is leaving for Michigan where he will undergo treatment for rheumatism.

and we must tell you one and all the searchlights at Niagara Falls are magnificent and it is worth the trip for any who have not seen them.

WELLANDPORT'S CLAIM TO FAME

Bill Hockey Fry of Dunnville not only both of them—seem able to keep Wellandport before the public, so that town has to get into the south-east corner of The Globe.

The Globe is a great advertising medium but Wellandport would have been better to have had a picture of Canboro avenue, looking east, with Len Durham or Dilly C. Holmes in the foreground. The despatch to The Globe says:

"Wellandport, July 4.—The little hamlet of Wellandport has stood patiently by and read with interest the strange and wonderful happenings of other towns and villages throughout the Dominion.

"It now believes itself worthy of a place in The Globe's southeast corner, owing to the fact that a Plymouth Road has been on the farm of Walter A. Wilson has adopted as the daily depulphory for her produce a robin's nest in the orchard. These will doubtless be the largest eggs Mrs. Red-brust has ever tried to hatch."

The manufacture of artificial silk, an industry which in the creation of yesterday, already gives employment to 150,000 people in the United Kingdom and is one of the big factors in Britain's export trade.

NIAGARA DISTRICT FAIR DATES FOR 1925.

(Continued from Page 6)

the fabric of the bag presents a wet surface, which is evaporated in the wind; cooling results. The chemical sterilization of water used by the army and all city water plants is now available for tourists in the form of chlorine-bleaching tablets called "Halocaine," which is effective in dilutions of 1 to 5,000,000. One halocaine tablet added to one quart of water and allowed to act for 30 minutes will render it safe for drinking. I would never think of taking a vacation tour without the protection against typhoid fever provided through the administration of anti-typhoid serum this is the method by which typhoid was eradicated from the army in the recent war. In the Spanish-American War typhoid cost more lives than bullets.

Heat The System

Intestinal disorders are perhaps the most common reasons for rendering the tourists hors de combat. Eating at different hotels and cafes, impure water, poor cooking and pneumonia from canned meat all suggest avenues through which the tourist may be incapacitated. When nature empties the stomach (if you ever took an ocean voyage you know the symptoms of mal de mer), or the intestinal track by frequent evacuations, it is a sign that the system is getting rid of offending material. This is accompanied by severe abdominal cramps and bad taste. Our treatment is to aid in this process and restore the system to normal. We rest the system from all food and give it plenty of water, tepid, if possible. It will help wash out the stomach if there is nausea and vomiting. Then take a quick action laxative (Epsom salts are good). There is, strictly speaking, no real intestinal antiseptic, but tablets of bismuth subgallate, five grains taken every hour for six doses, will help.

The bilious headache is due to intoxication; this has nothing whatever to do with your automobile. It means that your system is poisoned from intestinal waste products, and a good purge is usually all that is needed, with perhaps a dose of five grains of aspirin every three hours to relieve headache. A rest from diet for a while and drinking lots of water are necessary.

Colds are the most common type of fever when touring and are due usually to sudden changes of temperature which chill the body surface and stop the natural process of elimination with a resultant feeling of malaise. Wearing wool next to the skin is the best preventative. In treating, take a laxative as in auto-intoxication; if fever is present take an aspirin every three hours. GARR-

ling a sore throat with salt water is good. The use of analgesic balm spread on a cloth and placed from ear to ear under the chin and held in place with a broad bandage under the chin, over the ears and to the top of the head is beneficial; in bronchitis the balm cloth is placed over the chest. Analgesic balm is a solidified liniment obtainable in collapsible tubes, or it may be made as follows: Melt by heat three ounces of vasoline and add the following, which you have previously mixed: Menthol, 1 dram; camphor, 1 dram; eucalyptol, 2 drams. Stir while it is cooling. It is applied with the finger tips directly to the skin to relieve pain and to stimulate the circulation in sprains, bruises, lumbago and rheumatism.

In Sunstroke

In sunstroke the skin stops perspiring and is hot and dry the face red, and the head feels a great pressure. Get to a cool place, lie down, loosen the clothing, and bathe face, chest and wrists in cold water and drink as much water as you want. In heat exhaustion the condition is the opposite—the face is pale and the skin weak. You need stimulation in the form of strong black coffee or aromatic spirits of ammonia. Do not bathe the skin. Sunstroke comes from overheating under the direct rays of the sun; heat exhaustion comes from overheating in close quarters out of the sun.

In treating wounds absolute cleanliness; a cloth used for a wound dressing may "look" clean, but in a surgical sense it is not clean unless subjected to special heat to kill germ life. When we say that we have "caught cold" in a wound, we use a misnomer, for really germs have entered and caused inflammation with heat, swelling, pain and the development of pus. This is called a "poisoned" wound. Any kind of a wound or break in the skin should be treated by applying a sterile gauze pad dry after washing the skin in soap and water and antiseptic solution; if the wound is inflamed, soak that gauze pad with hot antiseptic solution. Sterile gauze is now marketed in one-yard pieces, sealed in cartons, and handy for first-aid kits. Chloroxene is our best antiseptic and is the product which makes Dakin-Carell solution evolved in the world war. It does not injure the tissues, yet is 50 times more potent than carbolic acid in destroying germ life. It is used in a one per cent. solution.

MURINE You Cannot Buy New Eyes But you can Promote a Clear, Healthy Condition of Your Eyes. Murine Eye Remedy. Write for Free Eye Care Book. Murine Eye Remedy Co., 5 East Ohio Street, Chicago. LESLIE J. FARRELL, The Retail Store GRIMSBY

tion, made by dissolving one tablet in one ounce of water, and applied as a wound wash or on pads as a dressing.

Cut by Glass

If you have a cut from a piece of glass, simple pressure with the cleaned finger will stop bleeding in severe cuts; pressure on the artery above must be made with a tourniquet, which can be improvised from a handkerchief or the triangular bandage. A pad is formed by tying a knot in the middle of the bandage or by enclosing a piece of cork or smooth stone beneath. This pad is then placed between the wound and the heart, exactly over the blood vessel leading to the wound. The ends of the bandage are passed around the limb and firmly tied together. A stick is inserted under the bandage and twisted until the bleeding stops, or in the case of snake-bite until the surface veins are so constricted that blood will not flow. Leave in place 2 minutes and then loosen it for a few seconds every 10 minutes for an hour before removing, so that blood supply is not permanently arrested, in that time clotting ought to occur. Once a clot forms, do not destroy it. Minor cut edges can be drawn together with narrow strips of adhesive plaster.

The fisherman often finds himself with a fishhook caught in his flesh. It cannot be withdrawn on account of the barb. Don't try to pull it out opposite to the direction in which it went in, but push the point with the barb forward, upward and toward the heart to the surface of the skin, and then cut off the barb with a pair of wire snips. You can pull the hook out readily in a direction opposite to that which it went in.

A remarkably small particle of dirt in the eye will cause impaired eye sight and so annoy a person as to incapacitate. The first thing to do in this case is to take hold of the lashes of the upper lid of the eye affected, and pull out and down and rub the closed lid of the opposite eye to encourage tears to flow over the injured eye and wash the particle out. If this fails, have someone place a toothpick horizontally over the middle of the upper lid, hold with the finger tips the lashes of this lid and, while pulling out and up, depress the match and the semi-lunar cartilage which forms the base of the upper eyelid, will move down and expose the upper lid. When the dirt is located, remove it with a corner of a clean cloth—pull the upper eyelid out and restore the shape. If inflamed wash the eye several times with tepid salt water, dropped from a squeezed cotton mop.

Use Hot Water

When you wrench an ankle, the ligaments become bruised or torn and there is a loss of function and pain with inflammation. Put this ankle to rest, pour hot water over it or apply hot water compresses and keep it elevated. When the swelling goes down, apply thickly the flame analgesic and bandage over it. The best splint for an injured ankle is made by alternating strips an inch wide of adhesive plaster first round heel to middle of foot and round heel up over ankle, leaving a space over the top of the instep for possible swelling.

In a dislocation the bone is broken or thrown out of place at a joint, causing the affected limb to be shorter than its mate. Study how the bone slipped from its socket and fast reverse the movements occurred at the time in order to reduce the dislocation.

A fracture is more severe because there is the element of shock present. The affected limb is painful, the contour is changed, a grating (crepitation) is felt and heard when the broken ends are rubbed. The ends are often, by muscular action, drawn out of position so that they overlap, overcrossing this muscle tension by steadily pulling the two broken parts in opposite directions until the ends meet in proper relation to one another. Hold them by laying saplings or cork or sticks of thin boards entirely around the break, interposing a padding of soft material next to the skin and then bandage all in place. If the parts are swollen, apply cold water compresses. A bone break should have the attention of a physician with an x-ray to ascertain just what is wrong and who can set the break with such intelligence to aid him. Your first aid help is to roughly splint the injured member so the soft flesh parts will not be further injured in transporting the patient to the doctor.

KILLING WEEDS ON SUMMER FALLOW

Considerable progress has been made in the use of intertilled crops as substitutes for the summer-fallow. Nevertheless, only a comparatively small part of the weedy land can be treated in this way, as sufficient live stock is not generally kept to consume the intertilled crops, and on extensive acreage will continue to be summer-fallow each year. In considering the best method to employ in killing weeds on summer-fallow, bearing in mind the need of keeping costs down, the operations will be described with under three heads.

Destruction of weed seeds.—In the destruction of weed seeds it should be realized that it is just as important to prepare carefully the seed bed for the weed seeds as it is to prepare the seed bed for wheat. In order to accomplish this it may even be necessary to use a packer on some soils to bring the moisture near the surface so that the small seeds will have the necessary requirements for complete germination. It may be advisable to leave the land undisturbed for some little time so that the weed seeds will germinate either from the moisture that arises from below or the moisture that falls as rain. When the land is cultivated to destroy the young weed plants it may even be necessary to harrow and pack the land down firm again so that a further crop of seeds will be destroyed. According to some experiments made a few years ago seeds of French-weed buried at a greater depth than three-quarters of an inch may remain dormant and as the cultivator teeth bring fresh seeds near the surface there will be a fresh lot of seeds to be destroyed.

Destruction of underground root stocks.—This class will include such weeds as couch grass, perennial sow thistle, etc. The destruction of this class of weeds is generally expensive and from the standpoint of cultivation may consist of either pulling the roots to the surface and raking them into piles and removing from the field or else keeping the summer-fallow black by frequent cultivation. Experiments in couch grass eradication at Minnesota go to show that the

cheapest method where a seed had been formed was to plough shallow about July 1 and commencing with a disc harrow about ten days later keep the land black. It was found that ploughing again about mid August was necessary and repeated during until time for seeding the crop the next year. The experiments showed that where this method of cultivation was followed with an intertilled crop the next year, the couch grass could be eradicated. Experiments in the districts with heavy soil would indicate that the broad-sharred duck-foot cultivator used often enough and with care will destroy the couch grass roots in the one season.

Winter seasons. In this class is included the weeds that start late in the summer and live through the winter and consist of such weeds as mustards, French weed, spear leaf goose foot, etc. Late fall and early spring cultivation of summer-fallow land is the most effective way of destroying these weeds. On some types of soils it will be found a decided advantage to leave the field ridged with the broad-sharred cultivator so that cross harrowing in the spring puts the field in good condition for the crop. On the heavier soils it may be necessary to give spring cultivation in order to have a good seed bed.

SPORT

BASEBALL ON SATURDAY

The local combination ball team—The Geo-Ros—will make their first appearance at Grimsby next Saturday afternoon with Niagara Falls as the visiting team. The Geo-Ros are managed by Gene Fraser and include Babe Roberts and Mayo as well as a couple of Geo's new ones for next winter. A big turnout is requested for the game.

BEAMSVILLE WILL HAVE SPORTS DAY

Next Saturday Clinton and Louth Agricultural Society Has Races and Softball Program.

A good days sport is on the card for next Saturday, July 18, at the Fair grounds in Beamsville when a Soft Ball tournament between Jordan, Vineland, The Thirty and Beamsville will be put on, and three good horse races—2.16, 2.23 and 2.40 classes—will be scheduled. Already several good ones are entered and the people will sure get a run for their money.

SPORTS AT STONEY CREEK AUGUST 12

It has been decided that Stoney Creek annual field day this year will be arranged by the Stoney Creek Athletic association instead of by the parks board, as formerly, and Wednesday, August 12, has been set as the date. At a meeting of the association on Friday night, Theo McCann was elected chairman of the general field day committee; W. S. Milne, chairman of the sports committee; Dick Black, entertainment, and J. A. Walker, grounds committee. The program will be similar to those of former years and will open at 9 o'clock in the morning with baseball games and close with a musical entertainment and garden party in the evening. Games, contests, drawings, baby show, races and other attractive events will feature the afternoon program.

ANOTHER IN ONE

Toronto, July 12.—Alex. Gooderham scored the third hole in one at the Rosedale Club this season on Saturday, July 11, when he negotiated the short sixteenth from the tee. The other two similar feats have also been made on this hole. Gooderham was playing with Joe Sullivan, who had the hard luck to lose the hole with a two.

FOOTBALL SCHEDULE OF HOME GAMES

July 15—Grimsby vs. Dundas
August 15—vs. Oshawa
August 22—vs. Hamilton

FIRE PROTECTION UP TO PEOPLE

Concerning the movement to obtain fire protection for Stoney Creek, the council decided to submit the question at once to the people, and it is likely the vote will be taken within the next month. Ratepayers in the section bounded by Webster's side road to the west, the lake shore to the north, Coopers' side road to the east, and the mountains to the south, only will be called to the polls, as this is the district which would receive protection. John Clough, chairman of the residents' fire committee, submitted to the council a report which suggested this action.

HOW CALIFORNIA STRIKES SOME

The Booster Club of California asks you to write back soon to your friends telling the truth about that part of the country, and one lady, who signs herself "Betsey O.K.," has complied, as follows:

I came to the land of the western sun. Where every business is overdone. Where the stores charge freight for the goods made here. Ask them the reason, they think you queer.

They serve you climate with all year meals.

It is so blamed hot your back just peels.

The Anaheim Club includes the State from San Diego to the Golden Gate. The movie stars marry twice a year; They would marry again if they were clear.

The grape fruit here is very fine. Crossed between lemon and pumpkin vine.

The cows eat barley instead of hay. And the cream gets lost in the milky way.

They sell you lots that are made by hand.

The ocean breeze is something grand— That is included with the price of land.

They weigh the neck and then the fruit.

They weigh it again and the hand to boot.

They claim it is wet if it rains once a year.

It is so dry you can't shed a tear.

The chickens have mites, and the dogs have fleas.

The desert wind blows and the oranges freeze.

We shovel sand and you shovel snow—

Just about a standoff far as I know.

So tune up your fiver and start for the west.

Where jobs are scarce and wages are less.

Bring all your cash and plenty of clothes.

When you get out more the Lord only knows.

I am telling this story which I know is true.

As seen by me through eyes of blue.

If the Booster Club ever gets this back.

They will change my eyes from blue to black;

They ask you to write the truth as a friend.

Now I have done so and this is the end.

The famous draft manuscript of Napoleon's stirring appeal to his army in Italy in his own handwriting was sold at auction recently in London for \$750. Three letters which Napoleon dispatched to Admiral Ganteaume on August 15, 1795, upon learning of the Nile disaster were disposed of for \$270.

"I Dreamt That I Dwelt in Marble Halls"

(1) The Ontario Lake Lodge. (2) The Pulls and the Tides. (3) A section of the Dining-room. (4) The Lounge leading to the Dining-room.

This new nine-story hotel, occupying the ground space of an entire city block, was taken over from the contractors two weeks before the Pacific Railway. It is the new at a cost of two million dollars and 6,500 feet up in the Canadian Rockies.

To equip this new hotel and hotel on June 1, 1925, 350 barrels of desks for rooms, with sheets and other equipment to match, had to be transported three and a half miles to be stored in the hotel the day of the fire. 8,000 pounds of meat, 1,000 pounds of turkeys, 500 pounds of fruit, 1,000 pounds of grapes, 12 whole hogs, 100 eggs had to be rushed from the States, Alberta, and placed in the hotel.

of potatoes, 200 sacks of flour, 20 tons of sugar, 5,000 pounds of butter, one ton of tea and a thousand pounds of fresh coffee had to be placed in the hotel.

All told, a special train of eight cars, carrying 350 tons of food, to be rushed in at the last moment, for at the opening banquet the new hotel on hand of 425 men and women, including three managers, had to be themselves equipped with rooms with bath, hot and cold running water, a restaurant and a ballroom.

The new Ontario Lake Lodge has 400 rooms with bath, all outside are telegraph and cable offices in the rotunda, and each bed-room contains a phone which can be connected with long distance.

A resident dining and lounge room will have offices in the building to look after the health of the guests and a special dining room has been built for the hotel, and a special dining room has been built for the hotel, and a special dining room has been built for the hotel.

Chateau Lake Louise is now said to be the largest and most modern equipped hotel in the world.
